

To whom it may concern: I want you to know what a positive impact KLOVE radio has on our family and our community. So many young people including my family, especially the children, love to listen to KLOVE radio. I know the positive words of the songs and DJ's have a very positive effect on the teenagers in Sioux Falls, SD. I believe it is in the best public interest to keep radio stations like KLOVE on the air and not let them be replaced with LPFM stations. This would be a sad day in our area to lose such a positive influence on the next generation and also myself, as a parent. It is such an encouragement to hear positive things every day and every hour. The US needs this type of message on its airwaves. They are also one of the sponsors of a HUGE 4 day "FREE" Christian music festival in Sioux Falls, SD - that this year drew over 230,000 people in 4 days. Their message is reaching many teens and turning their lives around for the better. KLOVE will impact the world for many years to come. Please, I urge you, do not let the LPFM stations, overtake stations such as KLOVE. Thanks. Deb Beukelman
